## **GLOSSARY**

**Accession agreement (AA)** – an agreement between a trade union and an employer to extend the scope of application of an existing agreement. One of the parties to the AA must also be a party to the latter – Article 504, CT.

**Adaptability** – the adaptability regime presupposes that given workers can be subject to various different working hours with different lengths of daily and weekly working time, which are articulated with one another in such a way that the normal working period, defined in average terms, is worked over the course of a certain reference period. As such, under this regime, work that lasts longer than the normal daily or weekly working period and is undertaken within the established working hours is not considered overtime – Articles 204-207, CT.

**Harassment** – undesired behaviour, namely that based on a discriminatory factor, which is engaged in when a person is either applying for work or is working or receiving vocational training, with the goal or effect of upsetting or disturbing that person, affecting their dignity, or creating an intimidating, hostile, degrading, humiliating or destabilising environment for them – Article 29, CT.

**Hour bank** – a regime under which it is permissible for workers to work a few hours over and above those covered by their normal working hours, without that work being classified as overtime. The additional hours are compensated for in time or money, by reducing the time worked on other days, by increasing the number of days of holiday, by awarding additional pay, or by combining multiple alternatives – Articles 208-208B, CT.

**Parallel agreements** – agreements whose content is essentially identical to that of those they parallel, with the same parties on the employer side, covering the same enterprise or sector of activity and with the same professional scope, and differing only in their personal scope in the sense that the trade union parties and therefore the workers covered are different.

**Hour credit** – time available to workers' representatives in which to perform their collective representation functions and which counts for all purposes as time effectively worked for their employer – Articles 408, 467 and 468, CT.

**Concentrated working hours** – a regime that entails working more than the normal daily number of hours on some days and the award of a weekly rest period that is longer than the usual two days – Article 209, CT.

**Flexible working hours (flexitime)** – a working-hour regime under which the worker can, within certain limits, choose the times at which his/her normal daily working period begins and ends. This regime is included in the Labour Code provisions on the protection of parenthood (Art. 56, CT). Collective agreements regulate different schemes under which workers can adopt flexitime because it is more convenient for them, more comprehensively than the Labour Code does.

**Collective labour regulation instruments (IRCTs)** – the different types of IRCT are as follows: collective agreements, accession agreements, arbitration decisions, administrative extension orders, and ministerial orders governing labour conditions – Article 2, CT. IRCTs are also subdivided into negotiated and non-negotiated instruments:

- **Negotiated collective labour regulation instruments** – the following types of IRCT are classed as negotiated: collective agreements, accession agreements, and arbitration decisions in voluntary arbitration proceedings – Article 2, CT.
- **Non-negotiated collective labour regulation instruments** – the following types of IRCT are classed as non-negotiated: administrative extension orders, ministerial orders governing labour conditions, and arbitration decisions in compulsory or required arbitration proceedings – Article 2, CT.

**Exemption from fixed working hours** – a system under which the times at which the normal daily working period begins and ends and the times of rest breaks are not predetermined. There are three possible formats: a) workers are not subject to the maximum limits on normal working periods; b) it is possible for the length of the normal daily or weekly working period to be increased; c) the parties can agree the length of the normal working period – Articles 218 and 219, CT.

**Normal working period (PNT)** – the working time which workers undertake to work, measured in the number of hours per day and per week – Article 198, CT.

**Ministerial order governing labour conditions** – a non-negotiated IRCT in which the Ministers with responsibility for the Labour Area and for the sector of activity in question jointly define the applicable collective regulations. Can only occur when there are no negotiated collective regulations, there is no trade union or employers' organisation and an administrative extension order is not possible – Articles 517 and 518, CT.

**Administrative extension order (PE)** – a non-negotiated IRCT in which the Minister with responsibility for the Labour Area, acting either alone or jointly with the minister with responsibility for the sector of activity in question, extends the scope of application of a collective agreement or arbitration decision to employers and workers who were not originally covered by it. It is only possible to issue an administrative extension order in the absence of a negotiated IRCT – Articles 514-516, CT.

**Administrative extension order (agreement extension procedure)** – the procedure for extending a collective agreement includes a number of phases, which incorporate the following acts: a request by one or more of the parties to an agreement for its extension; publication of the notice of a draft administrative extension order in the BTE, thereby making it possible for interested parties to formally oppose the extension; and finally, publication of the administrative extension order in both the BTE and the DRE.

**On-call** – a regime under which a worker commits to being available and contactable for work outside his/her normal working hours if necessary and when he/she is actually asked to do so.

**Coverage rate of current agreements** – the number of employees (TCOs) of establishments covered by collective agreements, as a proportion of the total number of employees in the universe of responses to the Personnel Survey (Mainland) (source: GEP/MTSSS).

**Coverage rate of published agreements** – the number of workers potentially covered by the collective agreements (CCs, ACs, or AEs) published each year (calculation in accordance with the DGERT *Relatório sobre regulamentação coletiva de trabalho publicado no ano de 2017* [Report

on the collective labour regulations published in 2017] (<http://www.dgert.gov.pt>), as a proportion of the total number of employees (Mainland – Personnel Survey)

**Teleworking** – work done as part of a legally subordinate labour relationship, usually away from the enterprise’s premises and using technological information and communication resources – Article 165, CT.

**Overtime work** – work done outside the worker’s normal working hours – Article 226, CT.

**Annualised average nominal inter-table wage variation** – for each IRCT, the calculation of the average percentage increase between the previous pay table and the current one, weighted by the distribution of workers by professional category, sourced from the *Quadros de Pessoal/Relatório Único* (Personnel Survey / Single Report) and from information directly provided by the enterprises in the case of firm-level and group-level agreements. The total average variations and the average variations by activity are calculated on the basis of these pay increases, weighted by the number of workers covered by each IRCT. Whenever new pay tables replace others that were in effect for more than twelve months, the respective increases are annualised (source DGERT/MTSSS).

**Annualised average real inter-table wage variation** – The average inter-table variation adjusted for inflation by the average rises in the national consumer prices index including housing (CPIH), measured between the dates on which the published tables and their predecessors entered into force. For each IRCT, the variation in the CPIH is calculated using the quotient of the simple averages for the indices for the twelve months preceding the dates on which the previous tables and the current tables entered into force. The resulting values are equal to the average of the variations in the various IRCTs, weighted by the number of workers covered by each one. As in the case of the inter-table variation, the values are annualised whenever necessary (source: DGERT/MTSSS).

**Collective agreements (Types)** – when the Report refers to “collective agreements by type”, agreements are broken down into the following categories: **Sectoral-level collective agreement (CC)**; **Group-level agreement (AC)**; and **Firm-level agreement (AE)** – Article 2, CT. The underlying concepts are as follows:

- **Group-level agreement (AC)** – an agreement between a trade union and multiple employers with regard to different enterprises – Article 2, CT.
- **Firm-level agreement (AE)** – an agreement between a trade union and an employer with regard to one enterprise or establishment – Article 2, CT.
- **Sectoral-level collective agreement (CC)** – an agreement entered into by a trade union and an employers’ organisation – Article 2, CT.

**Collective agreements (Subtypes)** – when the Report refers to “collective agreements by subtype”, agreements are broken down into the following sub-categories: **First (1<sup>st</sup>) agreement**; **Overall revision**; and **Partial revision**. The underlying concepts are as follows:

- **First (1<sup>st</sup>) agreement** – a new collective agreement that does not represent an overall or partial revision of an earlier agreement.

- **Overall revision** – a general revision of an earlier agreement, always accompanied by publication of the complete new text.

**Partial revision** – a general revision of an earlier agreement, which may or may not be accompanied by publication of the complete new text.
